

# CorelDRAW for Business and Enterprise

**Design better together with the solution that delivers value across your organization.**

When it comes to purchasing software, your organization deserves the flexibility to make the right choice for its needs, which is why we don't believe in a one-size-fits-all approach to licensing. You can decide whether to opt for a corporate subscription, or an Enterprise license, with both solutions providing you the best option for cost-effective, large-scale deployment.

## Lease or Own: the choice is yours

### Corporate Subscription

A CorelDRAW corporate subscription is a flexible annual payment plan tailored to fit to any size, providing the lowest up-front costs for deploying the software across your organization. Our corporate subscription also gives you the flexibility to run the previous version of the software beyond its lifecycle, whilst teams, or the wider organization migrate to the latest version. By choosing a subscription you will be guaranteed to have constant access to the latest tools, enhanced features and supporting technology.

### Enterprise License

A CorelDRAW Enterprise license can be deployed as a single seat and is built to scale. This perpetual plan requires a one-off payment which gives your organization the right to own CorelDRAW outright. Along with huge cost savings awarded to larger site installations, the Enterprise License **includes CorelSure Maintenance for the first year**. If you stay on a continuous CorelSure plan (we offer a 1 year or 2 year renewal option) you will significantly reduce your overall investment over time, and keeping your CorelSure Maintenance active, will provide you the same guaranteed access to the latest tools, enhanced features and supporting technology updates as a corporate subscription.

Additional benefits and comparisons between the two options can be seen overleaf.

### Connect and Collaborate with CorelDRAW.app Enterprise

As an optional add-on, whether you choose a subscription or Enterprise license, **CorelDRAW.app Enterprise** is available to support virtual design across your network. This collaborative tool provides you with the ability to seamlessly connect with clients, colleagues and stakeholders, fast tracking the design process, virtually, on any device. CorelDRAW.app Enterprise offers all users in the company domain access to shared designs through Microsoft SharePoint, OneDrive Business or a Google Workspace managed Google Drive. No installation is required, users can simply sign in using their corporate Microsoft 365 or Google Workspace account to view, review, annotate and approve shared designs, or create graphics in a web browser, or on iPad which can be shared across the corporate cloud.

### Volume Discount Levels

CorelDRAW Enterprise Licensing begins at one seat and scales from there. The larger the deployment, the greater the saving. Plus, we automatically offer generous discounting to Government agencies, charities, and non-profit organizations, where discounted pricing eligibility **starts at Level 4** - typically a price level set for large organizations with 251 seats or more.

	Number of Seats
CorelDRAW <b>Enterprise License Level 1</b>	1-4
CorelDRAW <b>Enterprise License Level 2</b>	5-50
CorelDRAW <b>Enterprise License Level 3</b>	51-250
CorelDRAW <b>Enterprise License Level 4</b>	251+

## CoreSure Software Maintenance

All Enterprise licenses come with **CoreSure Maintenance for the first year**, providing you with the latest technology, support, and peace of mind to do exceptional work and produce extraordinary results. It's important to note that you need to stay on a continual renewal program to reap the benefits of CoreSure Maintenance. If you decide to let the plan expire, it cannot be resumed at a later point in time.

### By keeping your CoreSure plan active, you will benefit from:

- **Up-to-the minute updates:** guaranteed access to the next release of CorelDRAW as soon as it's available. Under an active plan you also have the choice to use the latest and previous version of the software to enable you to migrate your organization gradually.
- **Multi-platform use:** Integral CoreSure covers the deployment of both CorelDRAW Graphics Suite for Windows or CorelDRAW Graphics Suite for Mac across your organization at no additional cost.
- **Discounting and price protection:** With CorelDRAW Enterprise licenses, cumulative license discounts are available, so your organization will benefit from further cost savings if additional licenses are added later on.
- **Centralized control & compliance:** CoreSure gives you control over your software distribution and activity. Your IT administrator has the flexibility to provision, track and deploy the software based on your organization's security requirements, plus with a single key you can install multiple copies, enabling a smoother, faster, centralized deployment.
- **Global licensing and language support:** CoreSure makes it easy for your business to respond to the demands of a global marketplace and workforce. You can request any available language you need, - up to 15 languages are available\* - and the benefits of CoreSure will be extended to all licenses you acquire during your coverage period, without additional cost or effort.
- **Platform virtualization:** With the help of common virtualization technologies, CorelDRAW products support desktop virtualization as part of CoreSure Maintenance. This offers you additional flexibility in deployment.
- **Quick start launch guidance for larger deployments:** For larger deployments of 10+ seats, you'll receive a dedicated team guiding you step-by-step through the launch process, setting you up for problem-free success from the get-go.

## Compare your options

	Corporate Subscription	Enterprise License
Access to the latest version when it becomes available	✓	✓
Right to use a previous version of the software under your purchase plan**	✓	✓
License ownership for perpetual use		✓
