

SureColor SC-F2100 (4C)

DATASHEET / BROCHURE

The SureColor SC-F2100 offers a complete DTG package for designing and printing t-shirts, polo shirts, tote bags and other fabric items.

The SureColor SC-F2100 direct-to-garment printer lets you set up and start printing t-shirts and other items straight away, with a complete solution including printer, printhead, inks and software. This new model offers faster, higher quality printing, with reduced intervention and the ability to create your own designs.

Complete solution

The SC-F2100 is part of a complete Epson DTG solution that includes printer, printhead, ink, software and warranty, meaning you can be assured that all parts have been designed and extensively tested to work optimally together.

Faster, higher-quality printing

The printer offers speedier results than earlier models, with additional fast print modes and improved ink circulation for quicker start-up. Plus it incorporates improved screening for smoother reproduction of images and a wider gamut.

Garment Creator software

Epson's versatile free Garment Creator software allows you to add text and multiple images, create user presets for image adjustment, and provides a hot folder and CMYK image support.

Reduced intervention

The SC-F2100 has an auto-maintenance mode with a separate cleaning cartridge to substantially reduce scheduled maintenance, as well as a dust catcher to prevent fluff and dust on the printhead. It comes with an optional fabric platen grip pad and platen grip tool to make garment placement easier.

UltraChrome DG ink

Epson's UltraChrome DG Inks are supplied in 600ml cartridges, and offer vivid colours and tough, crack-resistant white ink for printing on dark fabrics. White ink is circulated within the printer to reduce clogging.

Eco-friendly

Epson's UltraChrome DG ink has been awarded an ECO PASSPORT certification from OEKO-TEX®¹

KEY FEATURES

1. ECO PASSPORT by OEKO-TEX® is a system by which textile chemical suppliers demonstrate that their product can be used in a sustainable textile production. Epson UltraChrome DG ink and pre-treatment are certified by the Eco Passport. This is an international safety standard in the textile industry. It is certified to be safe for adults and children, including babies.
