

TM5

Overview

With the TM5 cup press from Secabo orders can be processed faster. It can carry transfers up to 5 cups at a time, making possible the 5 separately controllable heating elements. Thus, the TM5 is ideal for efficient sublimation transfers on ceramic cups and similar objects, especially for larger runs or higher throughput. The digital controllers control temperature and time of the heating elements exactly and safely. The contact pressure can be easily adjusted via a handwheel. The device is supplied with 5 cups for cups with content 325 ml, as an extra free is an additional reserve cuff. Optionally, another heating element for small cups is available. Our recommendation: Only switch on the individual heating elements for actual use, as this will save you the heating elements and save energy.

Features

Exchangeable heating sleeves

Exchangeable heating sleeves available - in several diameters, also conical.

Safe working

The safety and quality of this device is constantly monitored - according to German safety standards.

Variable work pressure

The work pressure is easy to adjust - in each case matching the transfer object and procedure.

Digital controller

Duration and temperature can easily be adjusted and monitored using the digital controller.

Higher productivity

5 individually controllable heating elements allow multiple transfers simultaneously.

Technical Data

dimensions	92 x 36 x 35 cm
max. mug height	12 cm
max. cup diameter	7.5 to 9.0cm cm
options	Heating element 60mm - 75mm
scope of delivery	Cup press with 5 heating elements 75mm - 90mm, power cable, 1 additional heating element 75mm - 90mm, user manual
max temperature	225 °C
maximum time preset	999 s
power supply	230V / 50Hz - 60Hz, 5x 350W
environment	+5°C - +35°C / 30% - 70% humidity
weight without packaging	35,00 kg
weight with package	35,00 kg
Brand	Secabo
